The diagram consists of seven horizontal rows of small, empty rectangular boxes. The first six rows are uniform in length, each containing exactly 26 boxes. The seventh row at the bottom is shorter, containing 17 boxes.

[illegible]

A 20x20 grid of small squares, some of which are shaded gray, representing a sparse matrix or a binary image. The grid is composed of 400 small squares in total. The shaded squares are distributed across the grid, with some rows having more shaded squares than others. For example, the first row has 10 shaded squares, while the second row has 12. The pattern of shaded squares is not regular, suggesting a random or pseudo-random distribution.
